■ SUMMARY

A software developer that loves to build things and working for continuous improvements. I do my best to contribute to a fun and engaging working environment. I enjoy technology and have experience with technologies like SQL/GraphQL and Python. A strong supporter of open source software and a diehard linux enthusiast.

■ WORK EXPERIENCE

● 2024-06 - present

Head Engineer

UiT- The Arctic University of Norway, Tromsø, NO

Working in a shared position between the education department and the IT department, trying to bring them closer together in relevant areas. This includes keeping a close dialogue between the two departments and furthering collaboration between them. I also assist in developing existing and new systems and solutions for the departments. This includes working with SQL, Python, GraphQL and other relevant technologies.
